Description

Designed for the on and off road enthusiast the GIVI engine guards give a more rugged and aggressive look as well as offering better overall protection for those unforeseen mishaps. Made from one inch tubing and available in matte black the GIVI engine guards are a great addition for the serious motorcycle enthusiast.

Fitment for 1994 and above models. Will fit American import '89-90 with slight modification Givi provides an 8 mm x 110 mm replacement bolt that's too short for the older Transalps. You'll want something more on the order of 130 mm long. If you live in a metrically-challenged area, use a 5/16 x 5 inch bolt and nut. You can still fit a 13 mm wrench on it.
